

VoIP Telephony: What's all the Fuss about

VOIP Telephony

Is now the right time for you to implement VOIP in your company? The cost savings and operating efficiencies of VOIP are dramatic, but is the quality and reliability sufficient to meet your needs?

These are VOIP questions that you should be asking NaturallySpeaking

NaturallySpeaking is a networking support company that prides itself in keeping on the leading edge of computer, datacom, Internet, and telephony technologies. NaturallySpeaking has been helping clients keep their networks robust and secure since 1992 and we have been studying VOIP since the technology was first introduced.

NaturallySpeaking supports Astra, Cisco, Linksys, Grandstream, and Digium

NaturallySpeaking believes that Linksys and Grandstream products represent the state of the art in technology, reliability, and affordability VoIP Telephone solutions. These include familiar digital telephones, wireless handsets and advanced IP telephones as well as robust applications, including email/voicemail integration, advanced call center features, mobility, and more. Implementing an IP enabled telephony solution enables your company to improve efficiency and productivity as well as allowing you to take advantage of the economies and advanced features of VOIP. Avaya and Cisco solutions from NaturallySpeaking provide the opportunity to deliver a phone for every need in your organization while offering:

Streamlined efficiency and productivity—Every telephone is equipped with the displays, feature buttons, speakerphones, speed dialing and more...that help everyone work better.

Converging your communications—Get connected directly to your LAN, simplifying administration and streamlining communications.

Remote access— IP enabled telephones and IP softphones are ideal for remote workers. They can enjoy all the advantages of their office phone wherever they are working.

Mobility in the office—Stay in touch down the hall, in the waiting room, on the factory floor or wherever with fully-functional wireless handsets that have all the features of a desk phone
